

K-Scholar

The image features a world map in light gray on a dark gray background. A network of yellow lines connects various colored circular nodes (white, yellow, green, orange, red) placed across the map, representing global connectivity. A small icon of a person wearing a graduation cap is located on the right side of the map, near the East Asian region.

K-Scholar

“ National cooperation project to integrate and share academic research information of the National Assembly Library of Korea, universities and institutes to create a environment for academic information convergence services. ”

('K-Scholar' means a scholar or researcher in Korea.

Main Services

01

Establish the K-Scholar DB

Integrating researcher information by the National Assembly Library of Korea and partner institutions

02

Operate the K-Scholar system

Providing K-Scholar API about researcher information and verifying the researcher information quality

03

ISNI registration (mostly Korean researchers)

Protecting copyright of domestic researchers and linking them with overseas researchers

04

Provide visualized statistical information about academic researchers

Constructing statistics based on the K-Scholar DB and co-developing a service model

K-Scholar DB

K-Scholar DB is a database that interconnects researchers' information of the partner organizations with the large author authority DB, which are owned by the National Assembly Library, using standard identification numbers.

- Establishing the linkage system for a cataloging system and an authority data system to register researchers immediately when cataloging the materials collected from the National Assembly Library of Korea (2015 ~)
- Checking quality of authority data by using an authors' similarity analysis program(2017 ~)

Authority records of the National Assembly Library (2007. 1 ~ 2017. 12)

Names
1,386,157

Works
4,066,811

Researchers
1,276,532

organizations
109,625

Elements

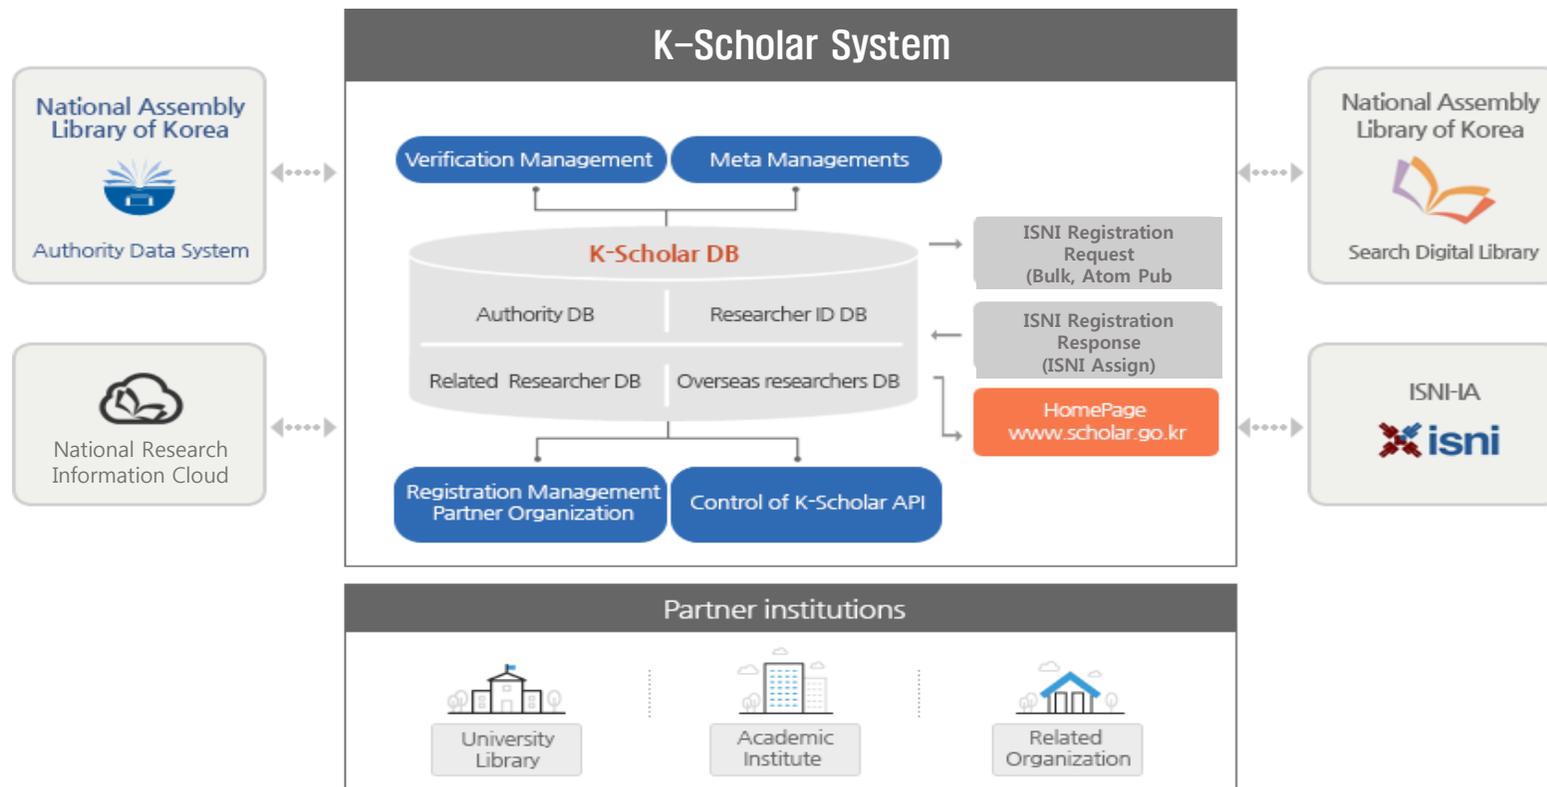

- ✓ **Basic Information** Name including variant names, Dates, Affiliated Institution ...
- ✓ **Works Information** Title, Publisher, Year of Ppublication...

✓ **Identifier** ISNI, VIAF, ORCID, local ID

✓ **Linking Information** Metadata, Full-text, Co-Authors map...

K-Scholar System

K-Scholar System is the first ISNI registration system based on Atom Pub API in Asia. The system is directly connected to the ISNI-IA system enabling by connecting quick ISNI registration. It provides identified researchers' works (metadata, full-text, co-authors map) by connecting highly reliable systems such as National Research Information Cloud, National Assembly Digital Library, ISNI.
